PROJECTS

Student Senior | [ReactJS, Redux, MongoDB, NodeJs, Tailwind](#)

08 2024

- Student Senior is a comprehensive platform designed to connect college students for mentorship, academic resources, and community engagement. It provides access to past year question papers, a marketplace for buying and selling essentials, and a supportive community where students can seek guidance, share knowledge, and collaborate.
- [Live site here](#)

Car Rental | [React, Vite, TailwindCSS, Axios, Node.js, Express.js, MongoDB](#)

02 2025

- Car Rental is a feature-rich web application designed for seamless car rentals, offering a user-friendly React-based UI, a robust Node.js backend, and a MongoDB database for efficient data management. The platform ensures smooth API communication using Axios, enabling users to browse, book, and manage car rentals effortlessly. With a responsive design and optimized performance
- [Live site here](#)

ClimateTown | [ReactJs, Neumorphism UI, Weather API, Llama API, Vercel.](#)

05 2024

- Climatetown is a modern weather app with a sleek Neumorphism UI, delivering real-time weather forecasts via API integration. Enhanced by Llama AI alerts, it provides personalized weather notifications and ensures fast, reliable performance with Vercel deployment.
